

Assignments – Day 1

1. Create following Tables. Use appropriate datatypes. Insert given rows in the tables.

Vehicle Table

vid	vname	price	discount	milage	category	details
1	Active	80000	10	35	Bike	Two-wheeler. Sturdy. Milage 30 km
2	Santro	95000	20	20	Car	Product of Hyundai.
3	Yamaha	160000	5	70	Bike	Sturdy and good milage
4	i-10	300000	8	18	Car	Good small car
5	Wager-R	250000	10	25	Car	Good milage car
6	Hero Splendour	75000	9	65	Bike	Best bike
7	Royal Enfield	190000	5	40	Bike	a royal bike

Note: Discount is given in percentage.

Customer Table

custid	cname	location
1	Nilima	Pimpri
2	Ganesh	Pune
3	Kishor	Kothrud
4	Priya	Aundh

Salesman Table

sid	sname	city	experience
10	Rajesh	Mumbai	5
11	Seema	Pune	8
12	Shailesh	Nagpur	7
13	Rakhi	Pune	2

1. Display vid, vname, price and details from table vehicle with column heading as Vehicle id, vehicle name, price, discount and details.
2. List all salesman working in Pune and having experience >5 years.
3. Add some new customers
 'Geeta' with custid 5 and area as 'Pimpri'.
 'Raj' with custid 6 and area 'Aundh'
 'Yash' with custid 7 and area 'Aundh'
4. Display information of vehicle, Royal Enfield.
5. Display information of all Bikes.
6. Display vid, vname, price, details and total price for each vehicle.
 total price = price - discount
7. Display information of vehicle i-10.
8. Display all vehicles whose price is less than 100000.
9. Display all the information of salesmen having experience more than 5 years.

10. Create a copy of table customer and salesman by name customer1 and salesman1.
11. Delete customer from area Aundh whose name is Priya.
12. Delete customer from Pimpri area.
13. Delete entire table Salesman1.
14. Meera leaves the company. Make necessary changes in table.

For the given schema, create the table and solve following queries
employee(eno, ename, basic, incentives)

eno	ename	basic	incentive
1	Rajesh	20000	1500
2	Sarita	25000	1000
3	Meera	15000	3000
4	Jitesh	30000	500
5	Ramesh	12000	3000

1. Write a query to change basic salary of Rajesh to 25000 and incentives to 18000.
2. Ramesh is promoted as Head Clerk and now earns salary 60000. Write a query.
3. Change incentive of Jitesh to 1000.

Note : Use Demobld.sql database shared in the assignment folder

Use Emp, Dept and Salgrade tables to solve following queries.

1. List all records with sal > 2000 and comm>200
2. List all records where job='Clerk' or sal>2000
3. List all the records with sal=1250 or 1100
4. List all employees with sal>1250 and <2850
5. Retrieve the details (Name, Salary and dept no) of the emp who are working in department no 20
6. Display all employees who have joined after 9th June 81.
7. Display empno, empname, sal, comm and total salary.
8. Display all jobs from emp table. Display should not give duplicate job names.
9. Display all unique deptnos in which employees are working.
10. Implement following using case statement. Use data from emp database.
If comm is null 'need improvement' If <500 'ok' If >=500 and < 1000 'good' 'Excellent'.
11. List the employees in dept 20 and 30 who did not get any commission.
12. Display all employees with sal >2000 and job is either clerk or Salesman.
13. Display all employees who work in either dept 10 or 30 and joined in year 1982
14. Display the emp details who do not have manager
15. Display all employees who joined between years 1981 to 1983.
16. Create new table emp10 same as emp without any data. Check its structure.
17. Display the emp details who do not have manager.
18. List all managers working in dept 10.
19. Display top three paid employees. List ename, deptno, job, sal.

20. Retrieve second highest salary from the emp table.

Banking Database:

Create following tables under database BankingDB. Insert given data and solve the queries.

```
-- 1. Create Database
CREATE DATABASE IF NOT EXISTS BankingDB;
USE BankingDB;

-- 2. Branch Table
CREATE TABLE IF NOT EXISTS Branch (
    branch_id INT PRIMARY KEY,
    branch_name VARCHAR(50),
    city VARCHAR(50)
);

-- 3. Customer Table
CREATE TABLE IF NOT EXISTS Customer (
    customer_id INT PRIMARY KEY,
    name VARCHAR(50),
    phone VARCHAR(15),
    address VARCHAR(100),
    branch_id INT,
    FOREIGN KEY (branch_id) REFERENCES Branch(branch_id)
);

-- 4. Account Table
CREATE TABLE IF NOT EXISTS Account (
    account_id INT PRIMARY KEY,
    customer_id INT,
    account_type VARCHAR(20),
    balance DECIMAL(10,2),
    open_date DATE,
    FOREIGN KEY (customer_id) REFERENCES Customer(customer_id)
);

-- 5. Transactions Table
CREATE TABLE IF NOT EXISTS Transactions (
    transaction_id INT PRIMARY KEY,
    account_id INT,
    transaction_type VARCHAR(20),
    amount DECIMAL(10,2),
    transaction_date DATE,
    FOREIGN KEY (account_id) REFERENCES Account(account_id)
);

-- 6. Loan Table
CREATE TABLE IF NOT EXISTS Loan (
    loan_id INT PRIMARY KEY,
    customer_id INT,
    loan_type VARCHAR(30),
    amount DECIMAL(10,2),
    status VARCHAR(20),
```

```

        FOREIGN KEY (customer_id) REFERENCES Customer(customer_id)
    );

```

```

-- Insert Branch Data
INSERT INTO Branch VALUES
(1, 'Pune Main Branch', 'Pune'),
(2, 'Mumbai Central', 'Mumbai'),
(3, 'Delhi Branch', 'Delhi'),
(4, 'Bangalore Branch', 'Bangalore');

-- Insert Customer Data
INSERT INTO Customer VALUES
(101, 'Rahul Sharma', '9876543210', 'Pune', 1),
(102, 'Sneha Patil', '9876501234', 'Pune', 1),
(103, 'Amit Verma', '9876512345', 'Mumbai', 2),
(104, 'Priya Singh', '9876598765', 'Delhi', 3),
(105, 'Rohit Kulkarni', '9876588888', 'Bangalore', 4);

-- Insert Account Data
INSERT INTO Account VALUES
(1001, 101, 'Savings', 50000, '2023-01-10'),
(1002, 102, 'Current', 75000, '2023-02-15'),
(1003, 103, 'Savings', 62000, '2023-03-20'),
(1004, 104, 'Savings', 45000, '2023-04-12'),
(1005, 105, 'Current', 90000, '2023-05-18');

-- Insert Transaction Data
INSERT INTO Transactions VALUES
(1, 1001, 'Deposit', 10000, '2024-01-10'),
(2, 1001, 'Withdrawal', 2000, '2024-01-15'),
(3, 1002, 'Deposit', 5000, '2024-02-10'),
(4, 1003, 'Withdrawal', 3000, '2024-03-12'),
(5, 1004, 'Deposit', 8000, '2024-04-08'),
(6, 1005, 'Withdrawal', 4000, '2024-05-20');

-- Insert Loan Data
INSERT INTO Loan VALUES
(501, 101, 'Home Loan', 500000, 'Approved'),
(502, 102, 'Car Loan', 300000, 'Pending'),
(503, 103, 'Education Loan', 200000, 'Approved'),
(504, 104, 'Personal Loan', 150000, 'Rejected'),
(505, 105, 'Business Loan', 700000, 'Approved');

```

Solve below queries using above tables.

1. Show all customers
2. Show customer account details
3. Show all accounts with balance > 60000
4. Show all **branches** available in the bank.
5. Display **name and phone number** of customers.
6. Show all **Savings accounts**.
7. Show customers living in **Pune**.
8. Display **loan types** available in the bank.
9. Show accounts with **balance between 40,000 and 80,000**.
10. Display loans with **status = 'Approved'**.

11. Show accounts with **account type = 'Savings' AND balance > 50000**
12. Display customers **not from Pune**.
